1100 PERSON MAN CAMP

2-PERSON ACCOMMODATION MODULE

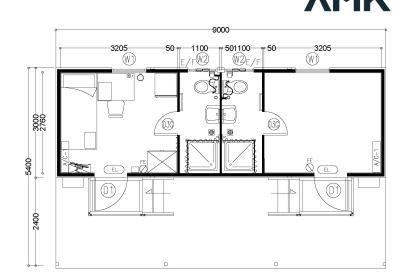

Dimensions: 3.0 x 9.0 m

Pictures of an actual unit built-out as an example

- Demountable, quick and easy assembly.
 Manufactured in conformity with the international standards.
- Steel Columns and Frame profiles. Rockwool insulated sandwich panel walling. Each unit contains:
 - 2 x Single Bed (98x208cm) with mattress and bed linens
 - 2 x Laminated Lockable Wardrobe (80x58x180cm)
 - 2 x Laminated Writing Desk (100x75x74cm)
 - 2 x Chair
 - 2 x Laminated Wall Mounted Shelf (60x30cm)
 - 2 x 12000 BTU Air Conditioner 2 x Water Heater, 50li
 - 2 x Exhaust Fan
 - 2 x Fire Extinguisher
 - All electrical, plumbing, and sanitary fittings.

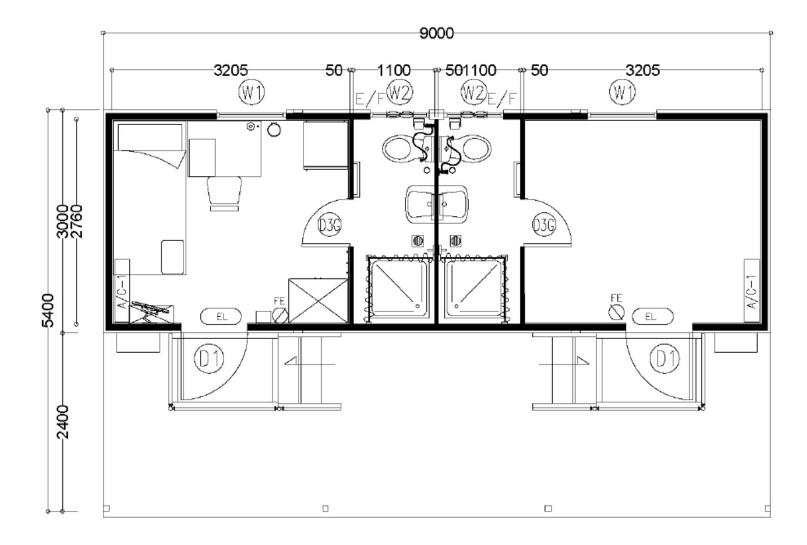

APPENDIX A DRAWINGS AND FURNISHINGS 1100 PERSON MANCAMP

brad@amking.com +1 713 628 3459

2 PERSON ACCOMODATION UNIT, 3m X 9M, AREA 27 m2 – Quantity 529

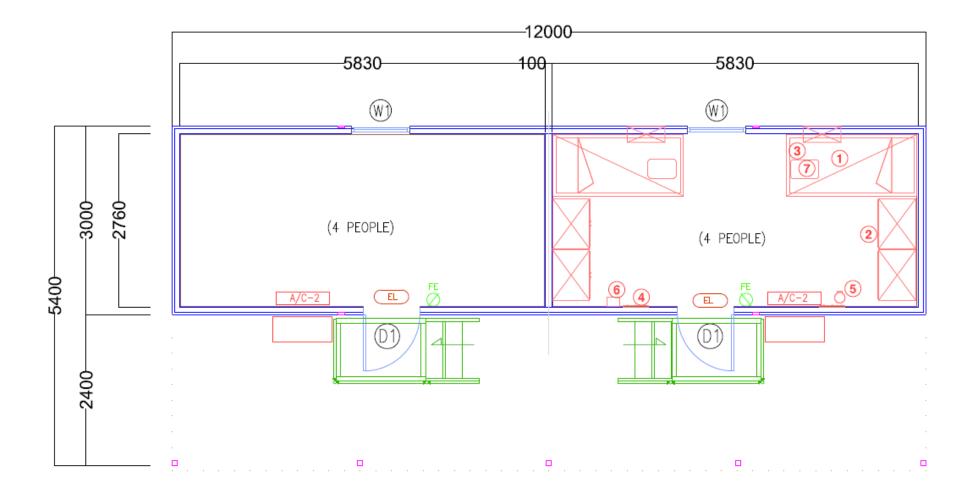

- 2 x Single Bed (98 x 208 cm) with mattress and bed linens
- 2 x Laminated Lockable Wardrobe (80 x 58 x 180 cm)
- 2 x Laminated Writing Desk (100 x 75 x 74cm)
- 2 x Chair
- 2 x Laminated Wall Mounted Shelf (60 x 30 cm)
- 2 x 12000 BTU Air Conditionner
- 2 x Water Heater, 50 liters
- 2 x Exhaust Fan
- 2 x Fire Extinguisher All electrical, plumbing, and sanitary fittings.

8 PERSON ACCOMODATION UNIT, 12 X 3M, AREA 36 m2 – Quantity 7

GENERAL SPECIFCATIONS

DORÇE Containers are demountable and are designed to allow an easy dismantling and erection for several times.

All architectural and structural designs are done by our technical personnel. Galvanized coated bolts and nuts are used for the connections.

MATERIALS CONFIRMITY WITH THE INTERNATIONAL STANDARDS:

Structural steel

DIN EN 10025/S235JR/St 37

Galvanize coating

DIN EN 10327/DX51 D+Z

Bolts and nuts

DIN EN ISO 8673, DIN EN ISO 4032, DIN EN ISO 4017, DIN 933, DIN 934

Cement Board

TS EN 634-2, TS EN 13986

Fire Resistance: B1 class acc. To DIN 4102-1, B class

acc. To DIN EN 13501

Rock Wool

TS 901-1 EN 13162, EN 13172

Fire Resistance: Non-combustible, TS EN 13501-1 and A class acc. to DIN 4102-1, heat resistance up to 750 °C.

Electrostatic Powder Coat

ASTM D 2794 impact resistance EN ISO 2409 adhesion EN ISO 2815 Buchholz hardness

Cement Board Paint

TS 6884, ASTM D 3359 cohesion

UPVC Sewage Water Pipes

TS EN 275-1 EN 1329-1

PPRC Clean Water Pipes

TS 9937, DIN 8078, TS EN ISO 15874-2

THERMAL PROPERTIES:

Heat transmission values are as follows; External Walls U= 0,407 w/m2k Internal Walls U=0,704 w/m2k Roof chassis U=0,322 W/m2k Base chassis U= 0,584 w/m2k Windows U= 2.9 w/m2k External Doors U: U= 0,592 w/m2k

SUPPORT STRUCTURE:

Columns and Frame Profiles

Floor and ceiling frame profiles, secondary profiles and columns are made of 2 layers of undercoated and corner columns are electrostatic powder coated steel sheet. Flashings are 2 mm thick UV resistant RAL 9002 colored polyester electrostatic powder coated (kilned at 200°C) galvanized steel sheets. All units will be delivered as flat packed and assembled with galvanized bolts and nuts at site.

Loads:

Roof live load : 60 kg/m2 Wind load : 25 kg/h

CORROSION PROTECTION

All required precautions should be taken against the weather conditions of Guinea such as heavy rain rate, existing in tropical region, etc. and in accordance with the 10 years of design life mentioned in the contract documents. Dacromet coated bolts & nuts, 275 gr/m2 galvanized coating where necessary (trusses & purlins, roof cladding, flashings, etc.) and painting system against corrosion should be applied. If the door and window frames will be produced in the new production system, then they will be electrostatic powder coated. Accordingly, if they will be produced in the old system, then they will be wet painted. In case of necessity, special type of coating and painting systems should be applied on the building components.

EXTERNAL WALLS

Panel height: In accordance with each spec.

Wall thickness: 80 mm

External Wall Covering: RAL 9002 painted Rock wool

insulated sandwich panel

Upper layer: 0.6 mm thick RAL 9002 colored steel **Core:** 120 mm thick rock wool insulation (100kg/m3) **Bottom layer:** 0.6 mm thick RAL 9002 colored steel

sheet

INTERNAL WALLS

Internal height: In accordance with each spec.

Wall thickness: 50 mm

Internal Wall Covering: Rock wool insulated

sandwich panel

Upper layer: 0.5 mm thick RAL 9002 colored steel **Core:** 50 mm thick rock wool insulation (100 kg/m3) **Bottom layer:** 0.5 mm thick RAL 9002 colored steel

SEPERATION WALLS

Internal Height (WC cubicle): 1900 mm (100 mm

space will be provided underneath)

Internal Height (shower cubicle): 1900 mm (100

mm space will be provided underneath)

Wall Thickness: 50 mm

Wall covering: RAL 9002 boyalı painted rockwool

sandwich panel

Upper layer: 05 mm thick RAL 9002 painted

galvanized steel sheet

Core: 50 mm thick rockwool insulation (100 kg/m3)
Upper Layer: 0.5 mm thick RAL 9002 painted

galvanized steel sheet

ROOF AND CEILING COVERINGS

Roof Covering Material: 0.60 mm thick with 27 mm roll depth, RAL 9002 electrostatic powder coated (kilned at 200°C) galvanized trapezoidal sectioned steel sheets (275 gr/m2).

Insulation Material: 80 mm thick mattress noncombustible rock wool insulation (40 kg/m3) Ceiling Covering Material: 8 mm thick RAL 9010

painted cement board

EKSTRA ROOF

Roof Cladding Material: Above steel trusses and purlins; 0.60 mm thick 27 mm trapezoidal sectioned, RAL 9002 electrostatic powder coated (kilned at 200°C) galvanized steel sheet (275 gr/m2)

Insulation Material: N/A

SHEDS

Sheds: will be produced uninsulated. Support system will be made of 2 layers of undercoated and final painted steel sheet. Roof cladding will be made of 0.60 mm thick 27 mm trapezoidal sectioned, both surfaces RAL 9002 electrostatic powder coated (kilned at 200°C) galvanized steel sheet (275 gr/m2)

FLOOR CHASSIS

Floor Covering Telecom Rooms: 2 mm thick antistatic PVC based, grey color, welded type floor covering

Wet Areas: 2 mm thick textured-nonslip PVC based, grey color, welded type floor Covering Other Areas: 2 mm thick PVC based, grey color, welded type floor covering (adhesive, welding wire, PVC skirting at dry areas and skirting cap for wet areas included)

Inner Surface Covering: 18 mm thick unpainted cement board

Insulation Material: 50 mm thick mattress noncombustible rock wool insulation (40 kg/m3) Chassis Steel Frame: Special bended, 2 layers of

undercoated steel sheet profiles.

External Surface Cover: 0.50 mm thick with 27 mm roll depth, unpainted galvanized trapezoidal sectioned steel sheet.

Chassis Load Capacity: 250 kg/m2

Floor covering material for First Aid, LSC Clinic, and LSC Medical buildings: will be transported separate from the floor chassis in order to be applied on site as overlayed. Accordingly, all required adhesive, welding wire, PVC skirting cap, will be loaded on related flatpacks.

STAIRS

External Stairs: Supporting frame and steps will be provided. Landing and Steps are made of steel sheet. All elements are hot-dip galvanized. Railing and balustrades are RAL 9002 electrostatic powder coated (kilned at 200°C) electro-galvanized steel sheet (275 gr/m2)

EXTERNAL DOORS

Door Frame: RAL 9002 colored polyester electrostatic powder coated (kilned at 200°C) galvanized steel sheets. Doors shall be equipped with weather stripping to maintain leak proofing.

Door Wing: RAL 9002 colored polyester electrostatic powder coated (kilned at 200°C) galvanized steel sheets and rockwool insulation material in between.

- **Hydraulic door closures will be provided at all doors. For double doors, push bar will be provided only at the active door.
- **Insect screen with self-closing mechanism will be provided only for the external doors of Accommodation Units (Same with the one in the Sample Container in the Factory, only a spring will be included for self-closing mechanism)
- **Grills will be provided on all electrical room doors (except for Guard House Electrical/Telecom Room door)

Door Handle and Lock: Metal door handle and cylindrical lock **Door Dimensions**

(D1) 900 x 2030 mm

(D1M) 900 x 2030 mm (with insect screen)

(D1G) 900 x 2030 mm (electrical room door w/ grill)

(D4) 1900 x 2030 mm

(D10) 1900 x 2210 mm

(D12) 900 x 2225 mm (telecom room door)

Water Drain: RAL 9002 electrostatic powder coated (kilned at 200°C) galvanized steel sheet

INTERNAL DOORS

Door Frame: RAL 9002 colored polyester electrostatic powder coated (kilned at 200°C) galvanized steel sheets.

Door Wing: RAL 9002 colored rock wool sandwich panel.

- Outer: 0.50 mm thick RAL 9002 colored galvanized steel
- Core: 50 mm thick rockwool insulation
- Inner: 0.50 mm thick RAL 9002 colored galvanized steel
 Ventilation grill will be provided only for wc room doors (in accordance with drawings)

Door Handle and Lock: Metal door handle and cylindrical lock at room doors Lock with indicators will be supplied for cubicles and rooms with single toilet (except for Accommodation Units). Toilet room doors having cubicles inside (like the ones in Offices and Camp Admin building) will not be fitted with handle and locks, only self-closing mechanism will be provided for these doors.

Door Dimensions

(D2) 740 x 1980 mm

(D2G) 740 x 1980 mm (with grill)

(D3A) 650 x 1900 mm (WC separation door)

(D3G) 640 x 1980 mm (wc door with grill)

(D5) 1480 x 1980 mm

(D8) 950 x 1980 mm (door for disabled people)

(D8G) 950 x 1980 mm (disabled wc door with grill)

(D9) 950 x 2210 mm (Telecom room)

(D11)1480 x 2210 mm

(D21) 740 x 1980 mm (swinging wc door)

WINDOWS

Window Frame: RAL 9002 colored polyester electrostatic powder coated (kilned at 200°C) galvanized steel sheets.

Window Wing: RAL 9002 colored Aluminum frame with 4+12+4 mm double glazing (frosted glass at band windows) Aluminum framed, plastic wired, removable fly screens will be provided at all large and band windows. Venetian blinds will be provided for large windows only in Office Buildings, Camp Admin, Medical Buildings, Fire Station and office areas in other buildings. All Large windows and band windows will be tilt opening type.

Window Handle: Aluminum handle

Window Dimensions:

Large Windows (W1): 938 x 1000 mm Band Windows (W2): 800 x 400 mm

Water Drain: RAL 9002 electrostatic powder coated (kilned at 200°C) galvanized steel sheet

**Blackout curtains with rails will be provided only for the large windows in accommodation units. (blackout curtains will be the same as in the sample Acc. Type A container in factory)

**Shutter system will be provided for bar area of Wet Mess building.

ELECTRICAL AND TELEPHONE INSTALLATION

Electrical Supply will be:

- 400V 3-phase 5 wire 50Hz (3 phase plus neutral plus earth)
- 230V 1-phase 3 wire 50Hz

Installation will be done over plaster by cable channels at panel surface.

- 200 lux illumination density at accommodation and ablution units;
- 50 lux illumination density at external and stairways will be provided 1 m above the floor level, will be provided.

Cables:

- Lighting Cables: min3x 2,5 mm thick Halogen free
- Socket Cables: min 3 x 4 mm thick Halogen free
- A/C & WH Cables: min 3 x 4 mm thick Halogen free
- CAT6 UTP CABLE

Armatures:

Internal lighting shall be T8-type fluorescent luminaires, complete with prismatic diffuser, high frequency ballast and fused terminal blocks. Lamp color will be 'warm white'

- Rooms; 2 x 36 Watt
- Corridors; 1 x 36 Watt
- Above the external doors and WC-Shower areas;
- weatherproof glob armature

Switches & Sockets: 16 Amp, 230 Volt, 3 wire, grounded, Sockets and switches at wet areas shall be of IP 54 protection class. For A/C and water heaters, neutral and single pole ON/OFF switch (2X25A junction box protection cam switch), lockable at OFF position

Telephone Socket: 1RJ 45 / 2RJ45 socket Data Socket: 1RJ 45 / 2RJ45 socket

Circuit Breakers:

- W-Automat
- Lighting circuit breakers; 10 Amp 6kA sockets C type or B type
- Socket circuit breakers; 16 Amp 6kA socket C type or B type
- A/C and W/H circuit breakers;20 Amp 6kA socket C type or B type

Main Distribution Box: Each unit will contain n.1 min IP20-40 main distribution box which will be located inside container. Ground fault current interrupter shall be located before the system circuit breaker on the main distribution box.

For ea. Lighting Line will be provided RCD w/ (RCCB) **Exhaust Fan:** Window type/Window Type exhaust fan will be supplied as per each building.

Exhaust fan line shall be connected to the lighting line of that particular area. Exhaust fans will be completed with a shutter.

Electrical installation inside the building shall be grounded.

- In Accommodation Units; Wall mounted 18-watt mini fluorescent light over bed
- An integrated single shaver outlet shall be provided between each 2 units of wash basin.
- An external weatherproof light fittings obove each external door; operated by a motion sensor will be provided.
- Internal lighting provided for the ablution block building shall be controlled by motion sensor
- At type A accommodations:
- 1 x single port SDP behind the television set
- $1 \times \text{single SDP}$ adjacent to the building fire alarm panel (where provided)
- 2 x SDP above the room desk

In a total of 2 x SDP (dual port) and 2 x SDP (single port) per Type A Accommodation Unit will be provided.

- Switches shall be mounted 1.20 m, power sockets and SDP shall be mounted 0.50 m above the finished floor level.
- All material used is TSE and CE certified.
- Lightning protection will be provided by others.
- Dorçe will provide earthing rods for 2 points of the building
- Emergency and Exit lights will be provided according to the attached drawings.

SANITARY INSTALLATION

Installation will be done over the plaster.

Clean water pipes: PPRC Wastewater pipes UPVC

Wash basin In Accommodation Type A, recessed type wash basin with above and below cupboard vanity unit; In Ablution Block Male, Ablution Block Female, General Purpose Ablution semi recessed type wash basins on compact laminated countertop; In all other wash basins are ceramic pedestal type

Water closet: Self-reservoir, double cistern, ceramic Eastern Type toilet: Ceramic, valve-controlled pipe reservoir

Urinal & separation panels: Ceramic

Taps: In doctor rooms and examination rooms of LSC Clinic and LSC medical buildings elbow operated taps; All other taps will be knob controlled w/gasket all taps in Ablution Units will be self-closing percussive type

Shower Tray & Cabinets: 80 x 80 cm dim., acrylic-Monoblock

Toilet and shower accessories:

For each shower; Shower curtain, towel hook, soap holder, shelf for each wc; toilet paper holder, mirror (over sink), liquid soap dispenser, paper towel holders, shattaf (cap and pipe), toilet brush All toilet and shower accessories shall be chrome. Accessories for disabled toilets and showers will be provided according to attached drawings. For each shower, venture type shower head will be provided.

Laundry Sink: Stainless steel; in dimensions according to attached drawings (only for Ablution Block Female and Ablution Block Male)

Urinal Sink: Stainless steel; in dimensions according to attached drawings (only for General Purpose Ablution and Ablution Block Male)

Kitchenette Sink: With draining, chrome coated stainless steel sink and 1 mm thick electrostatic

powder coated stainless sheet ($w \times I \times h$; 600x1000x850 mm) **Janitor Sinks:** Stainless steel sinks for mop cleaning will be provided in janitor rooms. The height of the sink surface will be 500 mm from the floor level.

Water Heaters: water heaters will be supplied according to the drawings. Capacities are stated on architectural drawings. All material used is TSE certified.

FIRE DETECTION & FIGHTING SYSTEMS

Fire Extinguisher: 2kg and 6 kg capacity fire extinguishers will be provided according to attached drawings.

Fire alarm panels are out of Dorçe's scope. Panels will be provided by others.

Fire alarm systems will include;

AIR-CONDITIONING

12.000, 18.000 & 24.000 BTU heating and cooling capacity wall mounted split type A/C units will be supplied according to the drawings. According to the contract specification refrigerant gas to be used in A/C units will be R134a, R407a, or R407C type.

Air Curtains will be provided in main entrance doors of buildings other than Accommodation and Ablution Units in accordance with the architectural drawings.

FURNITURE

Furniture will be procured in accordance with the approved lists attached

KITCHENETTE

Laminated countertop with stainless steel sink and cupboard below and above the countertop will be provided according to the drawings. Backsplash will be provider.

LAUNDRY & GYMNASIUM EQUIPMENTS

Will be provided according to attached drawings and presentation.
